Colour Variation

Variations in colour do occur, ordering products at one time will reduce this possibility. Efflorescence (a crystalline salt deposit) is a natural occurrence in masonry products. Efflorescence does not effect the structural integrity or strength of the product. Efflorescence will usually diminish and disappear in the course of time as the product is exposed to the elements. No responsibility will be accepted for the occurrence of efflorescence.

Delivery

When placing your order please confirm delivery zone pricing and minimum free delivery quantities applicable to your area.

Permits

Any council permits relating to product delivered to site are solely the responsibility of the customer. In ordering product for delivery beyond the kerb, the customer agrees to indemnify the manufacturer, supplier, carrier and agent against any action or expense relating to damage caused or consequences arising from delivery vehicles.

Claims

Please contact the store where goods were purchased to report any concerns regarding product colour or quality. Claims must be reported within 48 hours of delivery. No claims will be accepted once product has been installed. Erosion Control does not accept return of products for any reason.

Pallets

Please phone 1800 650 195 to have your pallets picked up. A receipt will be issued when pallets are collected. Please retain this receipt, as it will be required to claim any deposits paid. Pallets always remain the property of Erosion Control.
